Daegu Convention & Visitors Bureau

# INVITATION

Dear members of the shockwave therapy treatment industry,

We are in a time where the long two years of the Covid pandemic are finally meeting its ends. We are honored to be able to invite every single one of you to the 25th ISMST conference that will be held in Daegu from July 21st to 23rd, 2023.

The committee invites global scholars studying shockwaves in various fields and using shockwave therapy treatments to the conference that will provide information from essential to advanced understandings of shockwaves and other multiple activities.

We are highly confident that “Shockwave treatment in sports and injury,” followed by “shockwave-based regenerative medicine” sessions, will be a great help to keep you on hands with your future experiences in treating different kinds of pain.

Furthermore, we believe that you will be able to find interest in sessions that will discuss the unlimited potential of shockwave therapy even in the expanded field of nervous system, skin, and sex.

The experts in shockwaves will give lectures about the field's fundamental principles and even share know-how for the treatment with you. You will also be given a chance to achieve the “International shockwave therapy approval” by participating in the ICC (Instructional Certification Course) of the ISMST conference.

The ISMST 2023 will be different from the previously held conferences in that the 34th international shockwave symposium, ISSW34, will be simultaneously held in the same week in the same place, in the hope that a synergistic effect of the fields of engineering and medicine will give birth to a new area of integrative shockwave therapeutic study.

We are sure that the ISMST 2023 will be a good opportunity to build a network with world-class experts in the field of shockwaves therapy and create long-term branding and high marketing effects.

Thank you for all the attention and support.

*Seung Deok Sun*
